Impact Week Kickoff - Adam's Pool Service App

Oct 15, 2026

Tyler Morton Raul Montenegro 904chapman@gmail.com Jesus Saravia Marlon Fernandez Iliana Marticorena ~~Francisco Perez~~ ~~Daniel Barbu~~

Workshop session covering app background and competitive pricing via strategic discussion.

Engagement structure and workshop roadmap

- The engagement utilizes 3 structured workshop sessions covering product context, platform walkthroughs, and go-to-market data.

Product overview and target market

- Adam Chapman developed Brush and Net as a mobile field record service application for pool maintenance operators.
- Single truck operators comprise 75% of the market, while multi-truck operators represent the remaining 25%.
- Target geographic markets focus heavily on Florida, Texas, and California.

Core features and competitive differentiators

- Brush and Net eliminates per-pool pricing fees and provides real-time financial tracking and P&L statements.
- The application supports non-pool stops, chemical shopping list aggregation, and optional photo documentation for visit logs.
- Multi-user permission controls restrict pool technicians from accessing financial data or deleting customer records.

Technical architecture and migration challenges

- Adam built the application using AI development tools without traditional programming experience, creating maintenance risks.
- Seamless CSV and Excel data migration features are required to onboard users from competitor platforms.
- Darker color themes provide high contrast and readability under direct sunlight during outdoor field operations.

Market opportunities and localization

- Adam noted that 20% of pool cleaners in the US are native Spanish speakers.
- Adam proposed adding a Spanish UI toggle button to cater to the underserved market.
- Raul shared that a translation feature drove success for a previous oil well application.

Pricing structure and competitive strategy

- Adam criticized competitor platforms for recent updates causing multi-day system outages.
- Adam proposed a flat subscription fee of $55 per month for single users.
- Adam proposed a multi-user fee of $55 per month plus $25 per technician.
- Adam explained that flat pricing avoids pool-count charges used by competitor platforms.

Launch strategy, metrics, and geographic expansion

- Adam targeted acquiring 31 subscribers among the 60 pool operators in St. Johns County.
- Adam proposed offering a 2-week free trial to attract initial users.
- Adam outlined a regional expansion strategy starting in local Florida markets before scaling.
- Jesus endorsed starting with a small user group to identify and resolve issues.

Product features and future enhancements

- Adam proposed developing a desktop version to support record downloads and map routing.
- Adam explored adding a pool repair feature for pool-adjacent activities like pump replacements.
- Adam deferred the pool repair feature to the back burner due to licensing requirements.

Next steps

- ☐ [Jesus Saravia] Schedule Meetings: Review team calendar to send new meeting proposals to Adam.
- ☐ [Jesus Saravia] Share Repository Link: Forward the document link to Raul so he can verify access to the codebase.
- ☐ [Raul Montenegro] Analyze Codebase: Perform a technical analysis of the provided project repository.
- ☐ [Jesus Saravia] Provision Basecamp Access: Grant Adam and the team access to the Basecamp platform for document storage and communication.

- [ ] [Jesus Saravia] Schedule Meeting: Verify team availability and distribute the calendar invitation.
- [ ] [The group] Prepare Meeting Agenda: Review project requirements and plan the discussion structure for the next session.
- [ ] [The group] Evaluate Migration Strategy: Research technical methods to facilitate user data portability from existing service platforms.
